

# KnowledgePass LMS

## Anytime, anywhere Kronos training for your learning management system

KnowledgePass™ LMS is a premium feature within the Kronos KnowledgePass e-Learning subscription service. With KnowledgePass LMS, your organization can request KnowledgePass tutorials and hands-on simulations directly from the KnowledgePass portal and load them into your Learning Management System (LMS).

KnowledgePass LMS is designed to allow total flexibility in Kronos e-Learning deployment, management, and performance tracking. You can train your project team, IT staff and end users with content uploaded to your LMS and they'll still have continued full access to the KnowledgePass online portal.

### Save time for training managers and user administrators

Because all of your organization's users are already set up in your LMS, you won't have to build countless profiles in a new learning system. We supply tested and validated curriculum so there's no need to develop your own, allowing you to shift training resources to other high-value projects. You can centrally distribute, manage, and assign Kronos courses and track user progress and performance in your own organization's LMS. Each time your organization has a new hire who starts work, or a current employee who needs refresher training, direct them to your LMS where they already have a login to learn and stay up to date with Kronos solutions.

### Streamline learning in a familiar training environment

Hundreds or even thousands of users — including end-users such as line managers, administrators, and schedulers who use Kronos daily — can learn on their own time in a familiar training environment. With only one login for your users to remember and their Kronos training pre-assigned, you'll see better adoption of Kronos across your organization.

### Access training content easily

Content is configured in SCORM (Sharable Content Object Reference Model) standard 1.2, a widely adopted e-Learning format compliant with hundreds of popular learning management systems such as SumTotal, HealthStream, PeopleSoft ELM, and Saba. Requesting content is just three clicks away after logging in to your KnowledgePass account. KnowledgePass LMS is available as an annual subscription service, renewable each year to help ensure the self-paced learning of your organization's users is uninterrupted.

A KnowledgePass LMS FAQ document and list of KnowledgePass content for your LMS are available on the Learn page in the [Kronos Community](#). Also look for these documents using the KnowledgePass LMS Content Request link in the Menu block in KnowledgePass. The list includes the most popular tutorials and simulations for Workforce Central v6 and higher products and Kronos iSeries v6.1 and higher.

Thousands of Kronos customers today own Learning Management Systems. Leverage the learning system you know best with KnowledgePass LMS.

## Key Benefits

- » **USERS ARE ALREADY SET UP** in and familiar with your learning environment
- » **PERFORMANCE AND COMPLETION TRACKING** for employees and managers is centralized
- » **NO NEED TO DEVELOP** your own curriculum
- » **EASE OF ACCESS** leads to greater learning and better adoption of your Kronos system

## Frequently asked questions

### What is SCORM?

SCORM (Sharable Content Object Reference Model) is a set of standards for e-Learning software. It allows Learning Management Systems (LMS) that support SCORM to communicate with e-Learning content to track user activity and progress.

### What does the KnowledgePass SCORM content allow my LMS to track?

Most LMS systems will be able to track whether your users have viewed the content, and whether they have completed the content. Some LMS systems can also track time spent viewing the content.

### What are the end-user system requirements?

- Operating system: Windows 7, XP, Vista, or newer
- Web browser: Internet Explorer 8 or newer, or Mozilla Firefox 4.0 or newer
- Adobe Flash Player 9 or newer
- Screen resolution: 1024 x 768 minimum
- Pop-ups: enabled
- Broadband internet connection recommended

### Can I request the content only at the start of my subscription?

You can request content anytime during your subscription and as often as you need it.

### Does this content expire?

Your KnowledgePass SCORM content will expire and become unusable on the date your KnowledgePass subscription expires. When you renew your subscription, Kronos Educational Services will update the content with the new expiration date.

I already have a KnowledgePass subscription, so what happens if I want to purchase the KnowledgePass LMS subscription?

You will receive a credit for the number of unused days on your existing KnowledgePass subscription. Your new KnowledgePass LMS subscription will run one year from the date you purchase it, and your sales order will be credited for the unused time on your existing subscription.
